Education

CMR Technical Campus **Sep. 2023– May 2027**
Bachelor of Technology *Hyderabad, Telangana*

Sri Chaitanya Junior College **june. 2021– May 2023**
Intermediate M.P.C *Vijayawada, Andhra Pradesh*

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Operating System
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

Smart India Hackathon **Oct 2024 and 2025**
Government of India Initiative — Team Leader *Hyderabad, Telangana*

- Participated in Smart India Hackathon 2024 and 2025, a prestigious nationwide hackathon organized by the Government of India.
- Led a team in two consecutive Smart India Hackathon editions, developing and presenting innovative technology solutions for IoT systems (2024) and Education Technology (2025).

Projects

Voice Controlled Wheel Chair for Physically Disabled Robot | *Embedded C, Gitlab, Google* **January 2025**

- Developed an IoT-based voice-controlled wheelchair system using microcontrollers and voice recognition sensors to enable hands-free mobility for physically disabled individuals.
- Designed full-stack solution with front-end dashboard for real-time monitoring and back-end system for processing voice commands and storing user data.
- Implemented control algorithms translating voice commands into wheelchair movements (forward, backward, left, right, stop) with safety features and Successfully demonstrated working prototype showcasing practical application of IoT.

Smart AI Based Traffic Management System | *Python, Selenium, Google Cloud Console* **October 2024**

- Developed an AI-powered traffic management system using camera-based vehicle detection and Python image processing to dynamically reduce wait times at traffic signals.
- Implemented computer vision system where cameras capture real-time traffic photos, analyzed by Python code to detect vehicle density and adjust signal timing automatically within seconds.
- Designed dashboard for live traffic monitoring and visualization, demonstrating significant reduction in traffic wait.

Gamified Learning Platform For Rural Education | *JavaScript, HTML, CSS,PHP* **October 2020**

- Developed an offline-first gamified learning platform for rural students using HTML, CSS, and JavaScript, featuring XP points, badges, and story-driven quests to boost student engagement in low-connectivity environments.
- Built a dynamic backend using PHP and MySQL to manage user data, track learning progress, and deliver personalized adaptive content based on student performance.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio
Technologies/Frameworks: Linux, Jenkins, GitHub, JUnit, WordPress, Spring Boot

Leadership / Extracurricular

Sahaya Club **Spring 2022 – 2025**
Core Member *CMR Technical Campus*

- Technical Head, Sahaya Club — Led technical operations, managed digital initiatives, and coordinated volunteers for social service and fundraising events.
- Core Member, Sahaya Club — Contributed to event organizing, community outreach, and fundraising drives.

Certifications

Salesforce Agentforce Specialist — Oracle Cloud Infrastructure 2025 AI Foundations Associate
